Current Goals and Objectives

Every year, DRP establishes program goals and priorities based on input from the public, its stakeholders and Board, our Mental Health Advisory Council, and program data. Below are the goals determined for the years 2019-2021.

1. Protect and advocate for those subject to abuse, neglect, exploitation, and rights violations.

2. Promote alternatives to institutionalization and segregation and address treatment issues related to institutionalized persons.

3. Promote consumer-controlled, person-centered, recovery-oriented services so that people with disabilities live and thrive in their own homes and communities.

4. Eliminate discrimination.

5. Conduct outreach, training, and education.
